## Unit 4-Exponential Functions

Name: $\qquad$
Finding Exponential Models
Date: $\qquad$ Hour $\qquad$

## Day 5 Notes and Class Work

Example 1: Write an exponential function $y a b^{x}$ for a graph that includes the given points.

Step 1: Write the formula for an exponential function.
Step 2: Write the exponential function using
the ordered pair with the larger " $x$ ".
Step 3: Write the exponential function using the other ordered pair.

Step 4: Divide the two equations and simplify to find "b".
Step 5: Pick one of the ordered pairs and the "b"
value found in Step 4 to find " $a$ ".
Step 6: Write the exponential function
using the " $a$ " and " $b$ " values.

Example 2: $\quad$ Write an exponential function $y a b^{x}$ for the data in the table.

| $x$ | 0 | 1 | 2 | 3 |
| :--- | :--- | :--- | :---: | :---: |
| $f(x)$ | 4 | 2 | 1 | $1 / 2$ |

When there is a common ratio between the $y$ values the function is exponential.
Class Work: Find the exponential model for each of the following.

1) $(0,2)$ and $(3,250)$
$2)(3,2048)$ and $(5,131072)$
2) $(1,72)$ and $(4,52488)$
3) $(3,0.15625)$ and $(4,0.0390625)$
4) 

| X | 0 | 1 | 2 | 3 | 4 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{~F}(\mathrm{x})$ | 5 | 15 | 45 | 135 | 405 |

6) 

| X | 3 | 4 | 5 | 6 | 7 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{~F}(\mathrm{x})$ | 13.5 | 20.25 | 30.375 | 45.5625 | 68.34375 |

## Unit 4-Exponential Functions

Day 5 Worksheet

In exercises 1-6, write an exponential function $y a b^{x}$ for a graph that includes the given points.

1. $(2,122.5),(3,857.5)$
2. $(-3,24),(-2,12)$
3. $2,16,4,2.56$
4. $4,8,6,32$
5. 

| X | 2 | 4 | 6 | 7 | 9 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{~F}(\mathrm{x})$ | 96 | 1536 | 24576 | 98304 | 1572864 |

6. A pharmaceutical company is testing a new anesthetic. They injected 14 mg of the anesthetic into the bloodstream of a laboratory rat and then monitored the level of the drug every hour. The results are in the table below. (Hint: Round each of the ratios to two decimal places)

| Time (hr) | $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Anesthetic (mg) | 14.00 | 9.38 | 6.28 | 4.21 | 2.82 | 1.89 | 1.27 | .85 | .57 | .38 |

7. Multiple choice. For which set of data below is an exponential model most appropriate? Explain.
a.

| $\boldsymbol{x}$ | 0 | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{y}$ | 3 | 18 | 75 | 390 | 1800 | 10,000 | 50,000 |

b.

| $\boldsymbol{x}$ | 0 | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{y}$ | 3 | 15 | 75 | 375 | 1875 | 9375 | 46875 |

c.

| $\boldsymbol{x}$ | 0 | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{y}$ | 3 | 6 | 99 | 732 | 3075 | 9378 | 23331 |

8. Suppose $(0,4)$ and $(2,36)$ are on the graph of an exponential function.
a. Use $(0,4)$ in the general form of an exponential function $y=a \cdot b^{x}$ to find the value of the constant $a$.
b. Use your answer from part (a) along with $(2,36)$ to find the value of the constant $b$.
c. Write a rule for the function.
d. Evaluate the function for $x=-2$ and $x=4$.
